PRESS RELEASE

Komax Desuperheater Features The Patented Equalizer Mixing Module

Published: Mar 26, 2019 8:48 a.m. ET

Aa

HUNTINGTON BEACH, Calif., March 26, 2019 /PRNewswire/ -- Komax Systems, Inc., a global leader in inline static mixing and direct injection steam heating technologies, offers a high performance desuperheater that effectively cools superheated steam with the help of its patented Komax Equalizer Mixing Module.

Optimized Efficiency: Equalizer Mixing Module

Komax **steam desuperheater** differentiates itself in the marketplace with its unique low-pressure water injection.

By carefully directing the spray upstream into the flow of steam causes the water to reverse direction to pass downstream and through the **Equalizer Mixing Module**. This causes the steam and water to effectively combine with each other to reduce the superheat. Which delivers the desired outcomes in a more efficient way than others in the industry.

Unlike other desuperheaters on the market Komax's innovative **desuperheater** has six fixed mixing elements in the patented Equalizer Mixing Module. In addition to superior operational efficiency, cooling happens almost instantaneously as the fluid exits the mixing module. This enables customers to reduce their piping costs. With its capability to cool very rapidly, the need for additional pipeline lay length is minimized.

High Consistency, Safety, and Resilience

The eco-friendly steam desuperheater distributes a consistent temperature-controlled output. With the unique motionless system Komax has created, there is improved safety, less wear, and downtime to increasing lower the carbon footprint.

The desuperheater delivers more accurate temperature, minimize or eliminate thermal cycling fatigue in the piping. This ensures enhanced safety, and reduced wear, and downtime creating sustainability with low upfront costs and long product lifetime.

The low-pressure nozzle is designed to function flawlessly for a very long time, which ensures that maintenance is never an issue. With almost no noise or vibration, Komax **steam desuperheater** is an ideal fit for limited space.

Cutting-Edge

In any process that involves steam, Komax desuperheater offers cutting-edge solutions, unlike many other industry participants that continue to offer yesterday's technology.

Komax to Exhibit its Desuperheater at Vegas Expo

Nolan, a Senior Sales Engineer at Komax, will be exhibiting at the Electric Power Expo April 24 [th] to 25 [th], 2019 in Las Vegas. The exhibit will feature the latest desuperheater solutions from Komax.

For complimentary exhibit passes, contact Komax Systems, Inc.
